## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 1 is rejected under 35 U.S.C. 102 (e) as being anticipated by Uedahira et al. (Uedahira) (Patent Number 6,705,077).

Regarding claim 1, Uedahira discloses NOx discharge quantity estimation method for an internal combustion engine (3) equipped with an EGR apparatus (9) for circulating to an intake passage of the engine a portion of exhaust gas flowing through an exhaust passage of the engine, characterized in that a quantity of NOx contained in exhaust gas discharged from the exhaust

Application/Control Number: 10/540,012

Art Unit: 3748

passage to the outside is estimated on the basis of a quantity of NOx generated in a combustion

chamber as a result of combustion and a quantity of NOx circulated into the combustion

chamber via the EGR apparatus (e.g. See Figs. 3-8; col. 9, lines 30-67; col. 10-12, lines 1-67; and

col. 13, lines 1-20).

Allowable Subject Matter

Claims 2-10 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fails to

disclose or render obvious the claimed combination including the steps of estimating, as a

combustion-generated NOx quantity, a quantity of NOx generated within the combustion region

as a result of combustion, and an NOx quantity in a non-combustion region, the non-combustion

region being the remaining region of the combustion chamber; and estimating, on the basis of the

combustion-generated NOx quantity and the NOx quantity in the non-combustion region, a

quantity of NOx contained in exhaust gas discharged from the exhaust passage to the outside.

Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."

**Prior** Art

The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure and consists of six patents:

A .....li - ati - m/C - mtm-l Niversh

Application/Control Number: 10/540,012

Art Unit: 3748

Daudel et al. (Pat. No. 6826471), Yanagihara et al. (Pat. No. 5826427), Yokota et al. (Pat. No. 6269634), Nishimura et al. (Pat. No. 6725650), Hirota et al. (Pat. No. 5884476), and Ito et al. (Pat. No. 5775099) all discloses an exhaust gas purification for use with an internal combustion

engine.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Binh Tran whose telephone number is (571) 272-4865. The examiner can normally be reached on Monday-Friday from 8:00 a.m. to 4:00 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas E. Denion, can be reach on (571) 272-4859. The fax phone numbers for the organization where this application or proceeding is assigned are (571) 273-8300 for regular communications and for After Final communications.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
